

Psychology KS4

The educational purpose of Psychology is to enhance students' awareness about themselves and others. Studying Psychology encourages students to be more empathic and understanding of others, by challenging judgmental and prejudiced attitudes. Students will be taught to understand the world through the lens of psychology. This will help students in all areas of their lives by improving their interactions with other people and enhancing their ability to understand and regulate their own emotions and behaviour. and in doing so become successful independent learners.

	Autumn Term	Spring Term	Summer Term
